-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear from the claim language, including as argued, whether the drying step removes all the solvent, e.g., nitromethane, or not. Thus, it is not clear what the metes and bounds of the final composition, as claimed, is.

3. Claims 2-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In the instant situation, there does not appear to be any description of whether the drying step removes all the solvent, e.g., the nitromethane. There does not appear to be any water in the composition, or anything else that would be removed by drying, except the nitromethane solvent. Since something is removed by drying, as taught and argued by applicants, it is not clear what this can be other than the solvent. Thus, the invention is not described in such a way as to disclose the invention, or in such a way as to enable those of ordinary skill in the art to practice the invention.

4. Claims 2-6, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Bernardy in view of Swotinsky et al., and further in view of Klug and Donoho, and further in view of Crawford et al., Minnick et al., and Machacek.

Bernardy teaches pyrotechnics of color salts and a nitrocellulose binder. Substitution of a similar nitrocellulose binder containing nitro-compounds would have been obvious in view of

Swotinsky et al, who teach that such are notoriously well known. The form of claim 6 is admitted old by applicants in their specification. To the extent appropriate, substitution of a nitrocellulose gel as binder as taught in Klug and Donoho would have been obvious. The further in view of references, Crawford et al., Minnick et al., and Machacek, further show nitrocellulose gel including nitrocellulose and nitromethane, compared with other known solvents to make the gel or lacquer. These are only as the claims are understood. It is well settled that optimizing a result effective variable is well within the expected ability of a person or ordinary skill in the subject art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980), *In re Aller*, 220 F.2d 454, 105 USPQ 233 (CCPA 1955).

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning either this or an earlier communication from the Examiner should be directed to Examiner Edward A. Miller at (703) 306-4163. Examiner Miller may normally be reached Monday-Thursday, from 10 AM to 7 PM.
